

## A Proven Solution

### A Proven Solution

PowerSchool is the leading and fastest growing student information system (SIS) available today, supporting nearly 10 million students in all 50 states and over 65 foreign countries. Last year, more schools and districts selected PowerSchool than any other SIS product on the market. Today, PowerSchool supports a wide range of implementations – including schools as small as 25 students, districts as large as 80,000 students, and statewide deployments.

### Impact to Student Achievement

The deep functions of PowerSchool allow today's educators to make real-time decisions about each student while creating a collaborative environment for parents, teachers, and students to work together to prepare students for the future. Access to real-time information allows student performance to be addressed in a timely manner.

### Easy to Learn, Easy to Use

By leveraging the latest web technologies and evolving web design standards, PowerSchool presents users with a clean interface that is easy to learn and easy to use. With over a decade of experience as a completely web-based system, PowerSchool stands alone as the deepest and most flexible SIS available to meet the needs of K-12 districts. Through SIF® Compliance, an open platform, and the ability to share enhancements with other users, PowerSchool allows each customer to easily tailor the best solution for their needs.

### LunchTime

LunchTime augments the capabilities of PowerLunch by offering schools of all sizes the necessary functionality to manage their cafeteria point of sale data. LunchTime's strength is in being able to pass students through the lunch line efficiently while providing schools great reporting on all activity for both daily tracking and end of year reporting.

### Automatic Data Integration with PowerSchool

LunchTime will automatically integrate with PowerSchool, which means that no duplicate data entry is required. When changes take place within PowerSchool, changes flow through to LunchTime automatically saving you valuable time.

### Flexible Options

The various setup options supported by LunchTime make the software a great fit for any implementation. Each serving line is customized to its needs – cash-based, cashless, cashier processed or unattended cashier systems. Input devices include PIN-based systems, barcode scanners, finger scanners or photo pages.

### User-Friendly Software

All job functions will benefit from using LunchTime:

- Cashiers will be able to quickly process patrons through the serving line.
- Directors will be able to generate reports on single serving lines, single schools, multiple serving lines, multiple schools and all schools from one location.
- The Business Office will benefit from reconciliation reports, which allow for easy reconciliation of bank statements.
- The Technology Department will benefit from centralized software updates.
- Parents will benefit from the online portal, allowing them to view every transaction for each student in their household.

## About Pearson

As the industry leader in SIS and performance solutions, Pearson offers schools and districts access to deep expertise and an unparalleled selection of technologies that address the challenges of achievement, reporting, growth, and scalability. Our student information systems enable schools and districts to leverage technology to ease reporting burdens, open up lines of communication, and simplify internal processes, such as scheduling and grading.

We believe that providing today's schools and districts with a choice of flexible, interoperable, and customizable technology solutions is critical to establishing the infrastructure needed to power performance across all stakeholder groups, be it schools, districts, administrators, teachers, or students.

## About LunchTime Software

LunchTime Software provides customers of all sizes the necessary software tools to manage their cafeteria point of sale data. Solutions are currently implemented for single building schools, multi-school districts and food service management companies, recording data for many customers through a single implementation. Software modules include a fully-functional point of sale system, back office administration tools and reporting, SIS Integration tools, real-time free and reduced application processing, and a parent portal showing full transaction history and providing the ability to deposit money with a credit card or bank account.
