PowerSchool

A Proven Solution

A Proven Solution

PowerSchool is the leading and fastest growing student information system (SIS) available today, supporting more than 8.5 million students in all 50 states and over 65 foreign countries. Last year, more schools and districts selected PowerSchool than any other SIS product on the market. Today, PowerSchool supports a wide range of implementations – including schools as small as 25 students, districts as large as 80,000 students and statewide deployments.

Impact to Student Achievement

The deep functions of PowerSchool allow today's educators to make real-time decisions about each student, while creating a collaborative environment for parents, teachers and students to work together to prepare students for the future. Access to real-time information allows student performance to be addressed in a timely manner.

Easy to Learn, Easy to Use

By leveraging the latest web technologies and evolving web design standards, PowerSchool presents users with a clean interface that is easy to learn, and easy to use. With over a decade of experience as a completely web-based system, PowerSchool stands alone as the deepest and most flexible SIS available to meet the needs of K-12 districts. Through SIF® Compliance, an open platform, and the ability to share enhancements with other users, PowerSchool allows each customer to easily tailor the best solution for their needs.

Guard Textbook Assets

Leaf™ maximizes the use of valuable textbook resources in the school through accurate tracking and loss recovery. Fines for late, lost or damaged books are assessed automatically based on custom class requirements. With a few clicks, PowerSchool users can locate all existing textbooks, avoiding unnecessary and expensive replacement costs. Automated fines decrease the number of late and damaged textbooks.

Streamline Check Out and Return Process

Whether you have centralized or class-based distribution, Leaf saves time for teachers, administrators and students alike. By integrating with PowerSchool, lists of the required textbooks for each student are automatically created. If a student drops a class, the books are immediately due and recalled. Keyboard-free processing results in faster entries: simply scan an existing student card and the textbook. Leaf also allows users to easily mark damages, alter status and change location of multiple textbooks at the same time.

Build Confidence

Leaf gives PowerSchool users the tools to manage textbook assets accurately and efficiently. From school-wide summaries to student account screens, data is grouped and displayed in a clear and well-organized manner. Textbook fines can be linked to a school, a department, or to any other grouping. This allows the money paid for lost books to go to the correct GL accounts for replacement. Know the status and location of all textbook assets at all times with Leaf.

About Pearson

As the industry leader in SIS and performance solutions, Pearson offers schools and districts access to deep expertise and an unparalleled selection of technologies that address the challenges of achievement, reporting, growth and scalability. Our student information systems enable schools and districts to leverage technology to ease reporting burdens, open up lines of communication and simplify internal processes, such as scheduling and grading.

We believe that providing today's schools and districts with a choice of flexible, interoperable and customizable technology solutions is critical to establishing the infrastructure needed to power performance across all stakeholder groups, be it schools, districts, administrators, teachers or students.

About Rycor Software

Rycor Software brings enterprise-class SaaS solutions to PowerSchool. Maximize collections and revenue, guard assets and prevent fraud with Acorn™ Integrated Student Billing and Leaf Textbook Management.

By integrating with PowerSchool, Rycor Software enables users to efficiently manage school fees and textbook assets while keeping current with schedule and enrollment changes.

Rycor Software is based in Vancouver, B.C. and has provided solutions for school districts throughout the U.S. and Canada for over ten years.

Rycor Software is committed to customer service excellence. Through the intuitive interface design, the step-by-step user guides, and a helpful support staff, Rycor Software assists PowerSchool users every step of the way.
