

## A Proven Solution

PowerSchool is the leading and fastest growing student information system (SIS) available today, supporting more than 8.5 million students in all 50 states and over 65 foreign countries. Last year, more schools and districts selected PowerSchool than any other SIS product on the market. Today, PowerSchool supports a wide range of implementations – including schools as small as 25 students, districts as large as 80,000 students and statewide deployments.

### Impact to Student Achievement

The deep functions of PowerSchool allow today's educators to make real-time decisions about each student, while creating a collaborative environment for parents, teachers and students to work together to prepare students for the future. Access to real-time information allows student performance to be addressed in a timely manner.

### Easy to Learn, Easy to Use

By leveraging the latest web technologies and evolving web design standards, PowerSchool presents users with a clean interface that is easy to learn, and easy to use. With over a decade of experience as a completely web-based system, PowerSchool stands alone as the deepest and most flexible SIS available to meet the needs of K-12 districts. Through SIF® Compliance, an open platform, and the ability to share enhancements with other users, PowerSchool allows each customer to easily tailor the best solution for their needs.

SameGoal's unique integration with PowerSchool allows student information to be transferred directly to SameGoal's special education software, eliminating the need for repetitive data-entry and saving users precious time. PowerSchool users are able to view students' special education documents and access SameGoal by simply clicking a link on the student's PowerSchool profile.

### Collaborative Tools for Teams

The special education process is team-based, and SameGoal provides the features necessary for collaborative document management. Lead teachers can add additional teachers, service providers, psychologists, and others to contribute to the drafting of documents. Administrators can view and edit documents throughout the team process, and electronic copies of completed documents are easily shared with parents and outside agencies.

### User-Friendly Design

We strive to provide the best features for our users, and we seek to make them easy to learn and use. Our user-friendly design allows simple navigation between IEPs and evaluations, so all team members can share data with one another easily. Through our My Students feature, users can jump from student to student, making progress reporting and data collection simpler and quicker.

### Universal Access, Easy Maintenance

SameGoal's web-based program allows users to work from anywhere with an internet connection. Our hosted servers enable us to make immediate updates to reflect changes in law and regulations – a must-have feature in the always-changing world of special education. Administrators no longer need to worry about running their own annual updates.

## About Pearson

As the industry leader in SIS and performance solutions, Pearson offers schools and districts access to deep expertise and an unparalleled selection of technologies that address the challenges of achievement, reporting, growth and scalability. Our student information systems enable schools and districts to leverage technology to ease reporting burdens, open up lines of communication and simplify internal processes, such as scheduling and grading.

We believe that providing today's schools and districts with a choice of flexible, interoperable and customizable technology solutions is critical to establishing the infrastructure needed to power performance across all stakeholder groups, be it schools, districts, administrators, teachers or students.

## About SameGoal

SameGoal's mission is simple: to improve education through the development of user-friendly, collaborative solutions. Our flagship product, IEP Anywhere, is used by thousands of educators and administrators, from small charter schools to large urban districts. Our design and support have been the reasons why, over seven years, 95% of clients have renewed their licenses with SameGoal.

Our talented team of educators and developers works hard to bring cutting-edge technology to schools, with a focus on end users – teachers, service providers, psychologists, and others. We know that by providing these professionals with the best tools, they can provide children with the best education possible. And that's a goal we all share.
